

# TERMINALS FOR PRODUCTION CONTROL

A modern tool for efficient information flow management in a company.  
Designed for use in harsh environments of production halls.

## Usage:

- ▣ placing of production orders
- ▣ planning of the work of production staff
- ▣ depreciation of the material
- ▣ inspection of the technical drawings or 3D models
- ▣ on-line displaying of performance standards and other processes

## Technical Parameters:

- ▣ 19" touch monitor with IR scanning technology in the anti-vandal version
- ▣ computer according to customer requirements
- ▣ optional built-in smart card reader, barcode scanner, thermal or thermal transfer printer
- ▣ resistant paint surface due to a special chemical pretreatment

**We develop and produce terminals according to customer's requirements!**
